

Dear Customer,

Subject: Safe Use and Handling of Lead Containing Products (CAS 7439-92-1).

Registration, Evaluation and Restriction of Chemicals (REACH)

Article 7 “Registration and notification of substances in articles”

1. Any Producer or Importer of articles shall submit a registration to the Agency for any substance contained in those articles, if both of the following conditions are met:
 - a. the substance is present in those articles in quantities totalling over 1 tonne per producer or importer per year.
 - b. the substance is intended to be released under normal or reasonably foreseeable conditions of use.

Oxley Development Company Ltd (ODCL’s) complete range of products, including packaging, do not contain any substances that are “intended to be released” during normal or reasonable conditions of use but can offer the following advice to those who handle ODC products that contain lead.

- Ensure that control measures deemed appropriate to your process are implemented, are being utilised and that safe working practices are followed.
- Operators should always take proper precautions when handling products containing lead.

Under the REACH Regulations, ODCL is an “Article Supplier” that manufactures articles for supply into the EU. As a producer of “Articles” ODCL are affected by article 7 (with the referenced articles 57 and 59) and Article 33 of the REACH Regulation 1907/2006.

This letter satisfies REACH Article 33: Duty to communicate information on substance in Articles.

Further guidance can be found on the Health & Safety Executives website:

<https://www.hse.gov.uk/> and within [The Control of Lead at Work Regulations](#).
