

PinExpress

Rapid Machining & Plating Service

Oxley is now offering 'Pin Express', a rapid machining and plating capability for prototype and small batch quantities. Oxley is a specialist in precision turned components; all products are manufactured and plated in-house and include an inspection and plating report, providing full control over a complete end to end service. Typical machining tolerance is $\pm 0.05\text{mm}$ and average turnaround time for this service is just three weeks.
