

12 JUNE 2020

Dear Customer,

Statement of Compliance – California Proposition 65.

California Proposition 65 (formally known as the California Safe Drinking Water and Toxic Enforcement Act, November 1986), is intended to protect drinking water sources from chemicals that are harmful to health in either of the following ways: cancer, birth defects, or other reproductive harm.

Having reviewed the list which is updated annually, Oxley Developments Company Ltd (ODC), has determined that to the best of its knowledge and belief that products manufactured by ODC, in their original condition as shipped from its premises, do not contain substances that are listed within the current [California Proposition 65 list](#), dated 03 JAN 2020 at the concentrations that would require a Proposition 65 warning label.

To ensure there is no ambiguity regarding ODC products that contain lead, ODC hereby give notice that unless otherwise labelled, see [appendix 1](#), all products should be considered to contain lead.

ODC will continue to monitor California Office of Environmental Health Hazard Assessment ([OEHHA](#)) for changes to California Proposition 65 either for amendments or additions and communicating to customers where necessary.

Appendix 1

Lead-free product will bear a product label as displayed below, placed on the immediate product packaging (image not actual size).
